

An example of colorful lhs2<sub>TEX</sub> file. See the source at <https://github.com/phadej/gists/blob/master/posts/2018-06-21-colors-in-lhs2tex.tex><sup>1</sup>, and the result PDF at <https://github.com/phadej/gists/blob/master/pdf/ColorsInLhs2TeX.pdf>

```
module Colors in lhs2TEX where
newtype Foo = Foo Int
plusFoo :: Foo → Foo → Int
plusFoo (Foo n) (Foo m) = n + m
```

---

<sup>1</sup>It's named *tex* to trick *Pandoc* in my blog setup
